(54) Title: **LENTICULAR DISPLAY ASSEMBLY AND METHOD**

(57) Abstract: A lenticular display assembly comprises an image panel having a composite image. A lenticular lens panel is adapted to display a lenticular image from a composite image. Connection means are provided to releasably connect the image panel to the lenticular lens panel in an aligned relationship. Compression means are provided to press the image panel and the lenticular lens panel connected to one another by the connection means, whereby the lenticular image is displayed by the lenticular lens panel and the image panel being interconnected by the connection means and the compression means.
